YO-TAP-1, green fluorescent nucleic acid stain

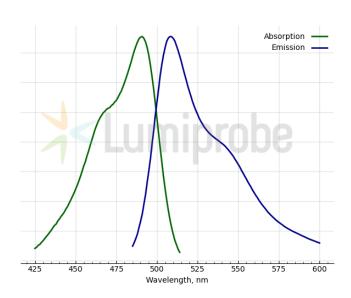

http://www.lumiprobe.com/p/yo-pro-1-nucleic-acid-stain

YO-TAP-1 (Oxazole Yellow Monomer, also known as YO-PRO®-1) is a green fluorescent carbocyanine monomeric dye. YO-TAP-1 is a cell-impermeant nucleic acid stain that is nonfluorescent in the absence of nucleic acids but exhibits a significant fluorescence enhancement upon binding to dsDNA.

YO-TAP-1 has a bright fluorescence signal and low background. The dye is useful for staining nucleic acids on microarrays, as well as for nuclear and chromosome counterstaining in microscopy. It may be used for monitoring of cell viability and apoptotic and dead cell detection in culture.

Structure of YO-TAP-1

Absorption and emission spectra of YO-TAP-1 (DNA-dye complex)

General properties

Appearance: orange solution

Molecular weight: 629.32 CAS number: 152068-09-2 Molecular formula: $C_{24}H_{29}I_2N_3O$

IUPAC name: Quinolinium, 4-((3-methyl-2(3H)-benzoxazolylidene)methyl)-1-(3-(trimethylammonio)propyl)-,

diiodide

Quality control: NMR ¹H and HPLC-MS (95+%)

Storage conditions: 24 months after receival at -20°C in the dark. Transportation: at room temperature for up to 3

weeks. Desiccate.

Legal statement: Product is offered and sold for research purposes only. Product is not tested for safety and

efficacy in food, drug, medical device, cosmetic, no express or implied authorization to use for any other purpose, including, without limitation, in vitro diagnostic purposes, for humans or

animals or for commercial purposes.
