5α-Dihydrotestosterone-d3

http://www.lumiprobe.com/p/5alfa-dihydrotestosterone-d3

 5α -dihydrotestosterone-d3 (16,16,17-d3) contains a stable deuterium label and is suitable for use as an internal standard for determining the concentration of this hormone in biological samples by chromatographic methods with tandem mass spectrometry (MS/MS).

In the body, 5α -dihydrotestosterone (DHT) has pronounced androgenic activity; its affinity for androgen receptors is higher than that of testosterone. The conversion of testosterone to 5α -DHT is catalyzed by 5α -reductase (5AR). 5α -DHT is an important biological marker in the detection of many diseases.

Structure of 5 α -Dihydrotestosterone-d3

General properties

Appearance: white solid Molecular weight: 293.47 CAS number: 79037-34-6 Molecular formula: $C_{19}H_{27}D_3O_2$

Solubility: Acetonitrile, DMSO

Quality control: NMR ¹H and HPLC-MS (95+ %, D: 98+ %)

Storage conditions: 24 months after receival at -20 °C in the dark. Transportation: at room temperature for up to 3 weeks.

Desiccate.

Legal statement: This Product is offered and sold for research purposes only. It has not been tested for safety and

efficacy in food, drug, medical device, cosmetic, commercial or any other use. Supply does not express or imply authorization to use for any other purpose, including, without limitation, in vitro diagnostic purposes, in the manufacture of food or pharmaceutical products, in medical devices or in cosmetic

products.
