

ROX NHS ester, 6- isomer

ROX (rhodamine X aka R101) is a highly fluorescent, and photostable rhodamine dye for various applications. ROX labeled oligonucleotide probes are often used in qPCR, and qPCR instruments have ROX channel.

This is reactive dye for the labeling of amino-groups in peptides, proteins, and amino-oligonucleotides. Pure single isomer.

This dye can replace Alexa Fluor 568, Texas Red.

Absorption and emission spectra of ROX dye

Absorption and emission spectra of ROX dye

General properties

Appearance:	dark crimson powder
Mass spec M+ increment:	516.2
Molecular weight:	631.67
CAS number:	117491-83-5; 1890922-83-4; 216699-36-4
Molecular formula:	C ₃₇ H ₃₃ N ₃ O ₇
Solubility:	good in polar organic solvents (DMF, DMSO), low in water
Quality control:	NMR ¹ H, HPLC-MS (80+%, balance mostly free carboxylic acid)
Storage conditions:	Storage: 12 months after receipt at -20°C in the dark. Transportation: at room temperature for up to 3 weeks. Avoid prolonged exposure to light. Desiccate.
TN VED Code:	3204190000

Spectral properties

Excitation maximum, nm:	570
ε, L·mol ⁻¹ ·cm ⁻¹ :	88000
Emission maximum, nm:	591
Fluorescence quantum yield:	1.0
