

BDP R6G NHS ester

<http://www.lumiprobe.com/p/bdp-r6g-nhs-ester>

BDP R6G NHS ester is an amine-reactive borondipyrromethene dye (an analog of BODIPY® R6G NHS ester) that has absorption and emission spectra similar to R6G.

BDP R6G is a bright and photostable dye that exhibits long living fluorescence that has little pH dependence. Due to the long fluorescence lifetime, this dye is useful for fluorescence polarization assays, and for two-photon experiments.

The NHS ester function can be conjugated with various amine groups, including those present in proteins and peptides.

Structure of BDP R6G NHS ester

Absorption and emission spectra of BDP R6G fluorophore

General properties

Appearance:	dark-green crystals
Mass spec M+ increment:	322.1
Molecular weight:	437.21
CAS number:	335193-70-9, 1443457-59-7
Molecular formula:	C ₂₂ H ₁₈ BF ₂ N ₃ O ₄
IUPAC name:	2,5-Dioxo-1-pyrrolidinyl 3-(4,4-difluoro-5-phenyl-3a,4a-diaza-4-bora-s-indacen-3-yl)propionate
Solubility:	good in DMF, DMSO, DCM
Quality control:	NMR ¹ H, HPLC-MS (95%)
Storage conditions:	Storage: 12 months after receipt at -20°C in the dark. Transportation: at room temperature for up to 3 weeks. Avoid prolonged exposure to light. Desiccate.
TN VED Code:	3204190000

Spectral properties

Excitation maximum, nm:	530
Emission maximum, nm:	548
Fluorescence quantum yield:	0.96
CF ₂₆₀ :	0.17
CF ₂₈₀ :	0.18
