Biotin alkyne

http://www.lumiprobe.com/p/biotin-alkyne

Biotin alkyne for the preparation of various biotinylated conjugates via click reaction.

This alkyne reacts with various azides, including biomolecules containing azide groups. Biotinylated conjugates can be used for various assays and applications requiring affinity binding.

Our recommended protocol can be used for the conjugation.

Biotin alkyne structure

General properties

Appearance: colorless solid

Molecular weight: 281.37

CAS number: 773888-45-2 Molecular formula: $C_{13}H_{19}N_3O_2S$

Solubility: good in DMSO and DMF, low in water Quality control: NMR ¹H (95%), TLC, functional testing

Storage conditions: Storage: 24 months after receival at -20°C in the dark. Transportation: at room temperature for up to 3

weeks

Legal statement: This Product is offered and sold for research purposes only. It has not been tested for safety and

efficacy in food, drug, medical device, cosmetic, commercial or any other use. Supply does not express or imply authorization to use for any other purpose, including, without limitation, in vitro diagnostic purposes, in the manufacture of food or pharmaceutical products, in medical devices or in cosmetic

products.
