Chemical phosphorylation amidite

http://www.lumiprobe.com/p/chemical-phosphorylation-reagent-iii

This product will be discontinued soon in favor of <u>Chemical phosphorylation reagent for oligonucleotide</u> <u>synthesis</u>. We may still have some material in stock (please see availability above).

Chemical phosphorylation reagent for the synthesis of oligonucleotides possessing 5'-terminal phosphate residues.

This chemical phosphorylation reagent is a solid, easy-to-dispense material.

Structure of chemical phosphorylation reagent

General properties

CAS number: 202284-84-2

Oligo synthesis details

Coupling conditions: 6 min coupling; 45 sec oxidation
Cleavage conditions: ammonia, 2 h at room temperature
Deprotection conditions: identical to protected nucleobases
